### **Drilling For Gas Started Here Sunday**

More than one hundred and fifty people witnessed the spudding in Sunday afternoon, January 11, of the first test well of the Waldron Gas and Oil company on the Harrison Huie farm, two and one-half miles northwest of Waldron.

Dr. C. Bevil, widely known physician and naturalist, directed the bit of the new Star No. 45 Spudder as it plunged earthward in search of the liquid gold in Scott county.

The drilling machinery of Whitehead and Eddington, contractors of Tulsa and Oklahoma City, was set in motion at 2:25 o'clock in the afternoon on a knoll midway between a small log cabin which was erected more than 75 years ago, and the grave of Harrison Huie, who was killed by bushwhackers in the spring of 1864.

### **Bevil Heads Corporation**

The Waldron Oil and Gas company, a corporation, is composed of local men. At its organization meeting the officers were elected. They are: Dr. C. Bevil, president; Gene Davidson, secretary-treasurer; Lee Crutchfield, Breem Crutchfield, and Henry Taff, directors.

The location of the well is in the SW 1/4 NW 1/4, 17-3-28 and the depth Wednesday afternoon was approximately 125 feet.

Drilling operations will be continued 24 hours each day, beginning today.

### **Early Showing Expected**

An early showing of gas and oil is expected by Mr. Whitehead, contractor. At a depth of 500 feet, a showing of gas and oil is expected. Gas is expected at 700 to 800 feet, and a stronger showing of gas is expected to be seen at from 1,100 to 1,800 feet; however, the well is to be drilled to 4,500, the capacity of the machinery, if it is necessary, Mr. Whitehead stated.

If one has faith in the near future return of prosperity, now is the time to get ready for it, so this paper has recently installed additional equipment, increased the force in its printing and reportorial force, adding new type faces, and planning for something big real soon. Business can't stop. Farming, merchandising, banking, printing and thousands of other lines of business will keep going, so, instead of slipping, why not take on a big united effort and advance?

Altogether now, one, two, three--"let's go."

### **Crop Loan Machinery Now Being Set Up (By B.S. Hinkle)**

Machinery is now being set up to handle the crop loans of the Government and no doubt the money will be ready for the farmers in a very few days. Let us now pass this warning to farmers: it is much better to get along on just as little as possible this year, and now is the time to be making out your budget and making your plans. Remember, if we get a loan there will come a pay-day, and if we borrow heavily we must pay heavily; the less we use of this money and yet make our crop, the easier we will pay this fall. The more we will have to pay on other debts. Make your figures close and borrow as little as possible.

### **Merchants Entitled to Business**

In many cases farmers owe store accounts that they will not be in position to pay and will get money from the Govern-

ment with which to buy feed, seed and fertilizer. When this is the case it is nothing more than good business to spend that money with the merchant who has graciously carried you over. That merchant is entitled to the business and should have it. If we can not pay, we can at least give the merchant some cash business, thereby allowing him to continue until we are in position to pay. Think this over.

### **Plant Early Crops**

This year farmers will want to plant early feed crops and we know of nothing better than oats. These should be planted early, February 5 to March 1 seems to be the best time to sow. At the outlook meeting here Wednesday it was recommended that we plant Ferguson or some strain of Red Rust Proof oats. At any rate we should have this year a large acreage of oats.

It was also recommended that we plant an early variety of corn, such as Funk's 90-day, a very early yellow corn. We expect to have some seed of this variety in Waldron by planting time.

### **Cotton Seed Should Be Tested**

We can now get your cotton seed tested free of charge at the University. If you are in doubt about your seed, bring or send me one pound and I will send them in and have the test made for you. We should always know what we are planting. Not all seed that look good will germinate.

### **Many Seeking Red Cross Aid in Scott County (Editorial)**

Some 304 families are now being supplied with Red Cross aid in this county. Perhaps a few of these are not deserving. But it is better to feed, say one in a hundred, undeserving, than to turn one distressed one down. There'll be no lack of criticism--

always is. Trace these rumors down and usually there is nothing more of it than hearsay. The committee pays little attention to rumors or unsigned letters. The Red Cross makes no distinction in regard to race, color, character...just one thing..."are you out of food and can get it no other way." Preachers and bootleggers look alike when hungry and with hungry families. We have both on the feed role. Everybody who is needy has a perfect right to make application for relief. It is no disgrace and if you think some are being fed who does not deserve it, keep silent unless you know the facts, then report to the committee instead of broadcasting to your neighbors.

#### **Economics Classes Will Mend Clothes**

The girls in the home economics classes of the Waldron high school will mend, clean and remodel the clothing donated to the Red Cross relief committee for distribution among those in need, according to a statement by Miss Elois Stanford, instructor. Home Economics Club."

#### **The Reporter "Tells Me Everything"**

Borger, Texas, January 10, 1931.  
Mr. J.B. Cox, Editor,  
The Advance Reporter,  
Waldron, Arkansas.

Dear Mr. Cox:

When I left Arkansas to come to Texas, you know, I thought it would be just fine. But after I arrived I began to change

my mind. Out here in Texas the wind blows in the day time and it blows all through the night; and to people who are not use to it, it is an awful sight. I never did like Texas, and I can tell you the reason why: the carbon is black and the sand is so thick, you never see the sky. You never see any trees, there is not a one in sight. I am going back to good old Arkansas; going back to live again; going back to Arkansas to drink water out of the spring. I never could have stayed in Texas this long if it hadn't been for one thing--and that is the Advance Reporter. It tells me everything.

Just another reader, Mrs. Neoma Welch.

The picture was really made in midocean and shows the gruesome cruelties inflicted upon less fortunate sailors. In a word, "a red-blooded sea picture." Added: Burton Holmes' travelogue, "Spain's Mad Festival," and "Our Nagging Wives."

Parks, Arkansas, January 9, 1931.

The Brothers and Sisters of The Red Cross,  
Dear Ones:

I haven't any way to come up to see you all, and I will just write to you. I have got a number of children that are barefooted and in need of clothes. I feel that I am entitled to the help of the Red Cross. This is my first time to ask any one to help me. We can't get much work to do for our children, and if you will be kind enough to send my children some things, I will appreciate your help as I am in need. If you will, please send me a box to Parks, Arkansas. I have seven children, six boys and a girl. I will thank you for anything that you can send. Hoping to hear from you soon, I am

Respectfully yours, XXXX

**Club Activities**

On January 22, Mr. G.W. Knox Jr., University of Arkansas, College of Agriculture, Extension Service, will be in the county to meet with some of the poultry raisers to form a committee to sponsor our "Grow Healthy Pullets" work.

Interest in poultry raising is growing and our poultry producers are finding that

there are many things yet to learn in order to make the most profit from a flock. One of these things is to produce a strong vigorous flock of pullets with the least possible loss of baby chicks and bring them into production properly, feed the right kind of feed to keep them laying, when eggs are the highest in price.

Several of our poultry producers in the county are demonstrating that eggs can be produced at a profit even at the present low price of eggs by proper care and feed.

We are anxious to have at least one turkey production demonstration in the county the coming year.

**Parks**

The Parks Home Demonstration club met at the home of Mrs. Steve Smith Wednesday, January 7. An all day meeting had been planned by the members, but as it rained during the morning and looked rainy all day, only a small number were present. Mrs. Smith was much disappointed. The next meeting will be at the home of Mrs. Irene Smith the first Wednesday in February. She expects a full attendance rain or shine.

-----

The women of Pleasant Hill community are busy making cream cheese. They report some good cheese--just as good as is bought at the store--but find it hard to keep it long enough to ripen properly, the members of the family are so anxious to eat it. Cheese makes a good substitute for meat in the diet. It takes very little time and is very little trouble to make.

**Pleasant Hill**

The Pleasant Hill Club met January 8 with Mrs. Rachel Jones. Eight members were present. Some went before noon and helped with the quilting. Meeting was called

The next meeting will be held with Mrs. Satterfield, January 22. We hope all members are present. It was suggested by the president that the lady who entertains the club should have work planned for the members to help with.
